

With our newest release of the S2 Form Processor for Highrise we've updated how we handle the trial process so that you can more easily and quickly determine if the script is compatible with your needs. Instead of having a 15 day trial period you'll now be able to download and configure a demo version with limited functionality and no time limit. The demo version of the software will allow you to work through the configuration process and test the script's functionality to make sure that it works in your hosting environment.

To get started with a trial simply visit [Download Demo](#) .
